

Product Name :
Twin Screw Food Extruder

Product Code :
EQMH-CHINA-MY3006016

Description :

Twin Screw Food Extruder

Technical Specification :

The main extruder adopts frequency speed controlling with high automation and stable per-formation. The screws are made of the alloy steel and special craft,durable usage,high pressure,the screw life is longer. Adopting the building block structure and combining willingly according to the different demand. The forced lubrication system,so that it can guarantee the equipment transmission life is longer. Auto-temperature control system, make the temperature controlling more direct viewing and the parameter more precise. Self-cleaning, screws can be cleaned by reputing wasted material. According to different screw design rate to full different technology request. With different structure, it is used in human food area and pet food area.
