

Product Name :
Twin Screw For Food Extruder

Product Code :
EQMH-CHINA-MY3006023

Description :

Twin Screw For Food Extruder

Technical Specification :

Hardness after hardening and tempering:

Nitrided Hardness:

Nitrided case depth: 0.50-0.80mm

Nitrided brittleness: less than grade 2

Surface roughness: Ra 0.4

Screw straightness: 0.015 mm

Surface chromium-plating's hardness after nitriding: ?900HV

Chromium-plating depth: 0.025~0.10 mm

Alloy Hardness:

Alloy depth: 0.8~2.0 mm

High temperature resistance, no deformation under high temperature;

Wear resistance, long service life;

Corrosion resistance, corrosive materials;

High strength, can withstand high torque, high speed;

Good cutting performance ;

Residual stress after heat treatment is small, thermal deformation is small, and the like.
