

**Product Name :**  
Kurkure Manufacturing Machine

**Product Code :**  
EQMH-CHINA-MY3003001

**Description :**

Kurkure Manufacturing Machine

**Technical Specification :**

- Multi-Shape Extrusion – Creates uniform curls, twists, or tubes
- Integrated Seasoning – On-line powder/oil coating for even flavor distribution
- High Output – 50-500kg/h production capacity
- Automated Control – Adjustable temperature, speed, and cutting length
- Hygienic Design – Food-grade stainless steel construction

Kurkure Manufacturing Machine – High-Efficiency Snack Production

The Kurkure Manufacturing Machine is a specialized extrusion system designed to produce crispy, curled snacks from corn, rice, or mixed flour with perfect texture and flavor infusion.

**Machine Components**

- Flour Mixing System?Screw conveyor and blender for uniform dough preparation
- Twin-Screw Extruder?High-shear extrusion barrel with temperature zones (80-180°C)Curl-forming die head for signature spiral shape
- Multi-Stage Dryer?3-zone hot air circulation (60-120°C) for crispiness control
- Flavor Coating Unit?Dual coating system (spray + tumbler) for powder/oil seasoning
- PLC Control Panel?Touchscreen interface with recipe memory function
- Packaging Conveyor?Cooled product transfer belt with metal detection

Name	size	power	capacity
Mixer	1.2*0.8*1.6M	4KW	50KG Per Time

---

Screw conveyor	1.6*0.6*1.7M	1.1KW	Continues
Extruder	1.8*0.8*2.4M	30KW	100-120KG/H
Air conveyor	1.4*0.4*2.3M	1.1KW	Continues
Fryer	5.3*1.3*1.7M	Main motor 0.75KW heating 40KW	200-260KG/H
Hoister	1.4*0.6*1.5M	0.75KW	Continues
Roller	3.4*0.8*1.7M	0.75KW	Continues
