

Product Name :
Pet Dog Food Extruder Machine

Product Code :
EQMH-CHINA-MY3002009

Description :

Pet Dog Food Extruder Machine

Technical Specification :

Siemens motor
Siemens and PLC touch screen, easy to operate
Machine cover and food contact parts are made of stainless steel, conforming to food grade.
Different sizes and shapes can be made by changing molds.
Basic recipe can be provided for reference.

The pet food line is suitable to make dry pet food for dog, cat, fish etc. Different sizes and shapes can be made by changing molds.
The 2-5ton pet food line are large project and usually should be customized as client's real workshop size. Also it has height limit, usually we recommend the mini height be 12m, the higher the better.

Advanced electronic control operating system makes it easier to control product quality, all parameters at a glance;
Transmission system adopts high precision and high strength gear box transmission, running balance, high transmission efficiency, the main machine is frequency conversion motor.
Dual-axis diameter difference conditioning device has the advantages of good conditioning effect.
Double screw design high pressure, self-cleaning performance. Mixing blade adjustment is convenient and flexible, keeping time can be selected; Liquid filler is reserved;
High precision feeding auger ensures accurate feeding quantity;
Wear-resistant bushing is embedded in the barrel and jacket is provided, which can be heated/cooled to facilitate the expansion of the product.

Efficient use of energy, reduce energy consumption, reduce processing costs;

The expanded granule has good stability in the water, which can effectively protect the breeding water and reduce pollution.
