

**Product Name :**  
Feed Pellet Dryer

**Product Code :**  
EQMH-CHINA-MY3007018

### **Description :**

Feed Pellet Dryer

### **Technical Specification :**

After discharging from fish feed extruder or pet food dryer, feed pellets is of high temperature and high moisture. So before storing and packing, we need fish feed dryer to dry it. And it is usually used in combination with fish feed cooler in the fish feed pellet line. It is of multi-layer structure and made of stainless steel, which ensure high efficiency and clean pellets. This pellet dryer machine is widely applied in chemical, food, medicine and other industries.

### **Unique Humanization Design of Our Fish Feed Dryer**

Energy saving is very important in industrial production. We adopt electric drying design for dryer working with dry type fish feed extruder while we use steam drying matching wet type fish feed extruder, thus saving power over 80%.

### **Fish Feed Drying Machine Features**

Steady drying, no damage to pellets.

They lay on the mesh belt with low forward speed.

Main indexes are adjustable like air quantity, heating temperature, pellets' staying time and feeding speed.

Hot air can be circularly applied.

Unique double design aiming at the differences of wet type and dry type fish feed extruder.

Ideal choice for drying fish feed and pet feed pellets and grains.
