

Product Name :
Sterilization Ripening Microwave Equipment

Product Code :
EQMH-CHINA-MY3007022

Description :

Sterilization Ripening Microwave Equipment

Technical Specification :

Sterilization ripening seafood drying equipment (Microwave industrial tunnel equipment, Microwave baking equipment, Peanuts drying and sterilization machinery) is one kind of machinery which is widely used for different grain and nuts drying and sterilizing, for example, for the sesame seeds, wheat, melon seeds, peanuts, corn, soyabeans, walnuts, almonds, chestnuts, pistachios, cashews and dried fruit etc.

Microwave unique characteristics of penetration, radiation, absorption etc.

Determine that the sterilization ripening seafood drying equipment has a fast drying speed, high efficiency and short time.

The drying function is accompanied by functions of sterilization and insecticidal eggs, which can extend the shelf life of the grains and improve the quality of the grains.

In addition, the sterilization ripening seafood drying equipment belongs to energy-saving and environment-friendly equipment.

Compared with other drying methods, it can save more than 30% energy, and it does not produce any pollution.
