

Product Name :
Spice Microwave Sterilization Machine

Product Code :
EQMH-CHINA-MY3007024

Description :

Spice Microwave Sterilization Machine

Technical Specification :

The power of microwave sterilization machine ranges from 10kw to 400kw, which is suitable for materials with various yields and moisture content.

We can also make specific machine according to customer requirements.

Compared with traditional high-temperature sterilization machine, microwave sterilization machine is less likely to cause materials to zoom due to high temperature.

The sterilization speed is fast, the average sterilization time is about 15 minutes and it can kill 99% of the bacteria.

The machine has special protection measures to prevent microwave leakage, so there is no need to worry about human body damage caused by microwave leakage.

The microwave sterilizing machine occupies a small area, is easy to operate, has no discharge of pollutants, is clean, safe and environmentally friendly.

Power (kw)	Dehydration Capacity (kg/h)	Sterilization Capacity (kg/h)
12	12	120 - 150
20	20	192 - 240
30	30	300 - 375
