

Product Name :
Ultra-low Temperature Blast Freezer

Product Code :
EQMH-CHINA-MY3014019

Description :

Ultra-low Temperature Blast Freezer

Technical Specification :

Ultra-low Temperature Blast Freezer Introduction

The blast freezer is one kind of freezers, and it is a professional instrument that is mainly used for commerce to save and preserve kinds of foods which need freezing. The blast freezer can freeze the food in minimum time so that the multiple nutrition and fresh flavor of the food can be kept.

Ultra-low Temperature Blast Freezer Features

This machine has the powerful refrigerating system and heat exchanger.
For its microcomputer temperature control, its cooling temperature is adjustable.
The chamber is made of double-sided stainless steel plate.
And the PU insulating layer is 120mm-thick and high-density polyurethane foam material.
It is equipped with copper pipes, double radiator.
It is noncorrosive and has luxury appearance.

Power	Voltage	Capacity	Temperature	Cabinet
1.8KW	220V/50HZ	600L/H	-20~-25?	1010*660*8
