

Product Name :
Brine Injector Machine for Meat

Product Code :
EQMH-CHINA-MY3014022

Description :

Brine Injector Machine for Meat

Technical Specification :

Brine Injector Machine

Brine injector is designed for injecting brine into beef, pork, chicken or fish to add special flavor or water to increase the weight of the meat.

The whole process of meat conveying and saline injection is completed automatically.

Please make sure your brine injector is cleaned after every use.

Brine Injector Machine Features

Using compressed air, more convenient and efficient to clean the needles.

The speed can be regulated at variable frequency.

The brine injection machine can inject under the bone tissue.

Stainless steel brine tank.

Easy-to-read and simple-to-operate control panel.

Removable injection heads/needles.

Equipped with automatic protection device for protecting the injection needle from being damaged by hard object.
