

Product Name :
Fish Speed Cleaning Machine

Product Code :
EQMH-CHINA-MY3014030

Description :

Fish Speed Cleaning Machine

Technical Specification :

Fish Killing & Cleaning Machine Introduction

Fish speed cleaning machine is characterized by fish back dissecting and fish guts removing , membrane cleaning and so on.

Just need one person to put the fishes into the machine in order, the machine will complete the operation automatically.

It is very easy to be operated and also an ideal machine to save cost & labor.

Fish Speed Cleaning Machine Features

Fish speed cleaning machine has a special designed water spraying system, which not only cleans the fish, but also helps the fish moving forward during the dissecting process.

Fish cleaning machine is controlled by PLC program and optoelectronic real-time system with Hybrid Synergy Drive, takes use of vacuum tank to extract the fish internal organs .

This machine is highly efficient.

The capacity reach 2400 fish per hour when the average weight is 1kg per fish.

This machine can smoothly dissect the fish's back in the middle.

The vacuum tank can extract 60% internal organs, and the remaining organs and membrane will be cleaned by brush wheel.

At last, the 99% internal organs can be cleaned. And the membrane removal rate can reach about 95%.

Fish Speed Cleaning Machine Advantages

Stainless Steel

Suitable for a variety of fish,widely used.

With latest technology and unique design;

Machines can be customized according to your requirements;

Just needing 1-2 workers to operate, labor-saving, small land occupancy and investment;
