

**Product Name :**  
Automatic Fish Cutting Machine

**Product Code :**  
EQMH-CHINA-MY3014031

**Description :**

Automatic Fish Cutting Machine

**Technical Specification :**

**Fish Cutting Machine Introduction**

The fish cutting machine is the essential equipment of fish processing and aquaculture, it can cut fish into different kinds of shapes such as filleting, segment, strip, blocks and so on.

The fish cutting machine can process any species of fresh fish, micro-frozen fish.

**Fish Cutting Machine Characteristic**

The whole machine is made of stainless steel material, easy to clean and hygiene.

The fish can be automatically cut into different shapes, like fillet, shred, strip, etc.

The size of the cutted fish is uniform, stability, convenient to eating.

Simple to operate, well designed, high efficiency.

High quality, large production and reasonable price.

The size can be customized by the customers.

It can be used in food factory for processing crisp fried fish, spiced fish and steamed fish fillets, etc.

Capacity: 200-400kg/h/400-600kg/h

Power source: 1.5Kw 220V/2.2Kw380V
