

Product Name :
Fish Scale Removing Machine

Product Code :
EQMH-CHINA-MY3014032

Description :

Fish Scale Removing Machine

Technical Specification :

Fish Scaling Machine Introduction

Fish scaling machine is used to remove the fish scale in an automatic and sanitary way.

The whole descaling process has no damage to fish with soft brush type rolling.

The fish scale removing machine can process fishes with any sizes, and it is widely used in restaurant and fish processing plants, etc.

Fish Cleaning Machine Function & Features

Wholly made of stainless steel with brush-type structure; can remove the fish scales cleanly without any damage to the fish body.

The scales can be automatically separated from the fish, and then the de-scaled fish is discharged from the discharging hole.

Equipped with the protective devices to avoid motor overheating or leakage.

Large working capacity of 1000kg-4000kg /hour.

No limit of the size of fish.

Widely used in fish market, large restaurants, and fish processing plants.
