

Product Name :
Multifunction Nut Roaster Machine

Product Code :
EQMH-CHINA-MY3016020

Description :

Multifunction Nut Roaster Machine

Technical Specification :

Drum Type Roaster Machine Introduction

Multipurpose drum-type roasting machine is mainly used in food industry for drying and roasting the granular materials, such as peanut (with hull or without hull), chestnut.

Multifunction Nut Roaster Application

Available for peanuts, sunflower seeds, sesame, soybeans, chestnuts, filberts, melon seeds, pumpkin seeds, pine nuts, horse beans, almonds, walnuts, pistachios, etc.

Drum Type Roasting Machine Advantages

Multiple heating methods: electricity, oil with fast heating result.

Automatic temperature controlling device (0-300?): taking the hot air as the heating medium, so the product can get constant and even heating.

This nut roasting machine can be used together with oil press.

After the nuts are fried by roasting machine, it can highly improve oil yield and reduce machine wear.

Rotary drum design for even heating.

Automatic roasting and discharging, the roasted nuts and seeds are of bright color with fragrance.

Recommended roasting time is 15-20 minutes.

Easy operation and maintenance, energy saving, stable performance, low operating cost and long service life.
