

HARVESTING EQUIPMENT AND COMBINE HARVESTERS

Combine Harvester

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3022001	Harvesting Equipment and Combine Harvesters	China, exported worldwide

Description

A combine harvester cutting, threshing, separating and cleaning grain in a single pass through the field, delivering clean grain to a tank and returning straw to the ground or a swath.

Combine selection is driven by the crop, the acreage and the harvest window, since the machine has to clear the crop in the days when it is actually ready. Header width and threshing capacity set the rate; grain tank size and unloading arrangement decide how much time is lost waiting for a trailer. Ground conditions determine whether wheels or tracks suit. Contact us with your crops, hectareage and harvest window and we will advise on the machine class.

Technical specification

Material	Mild Steel
Power	101 HP at 2200 r.p.m.
Usage/Application	Agriculture/ Farm
Speed Adjustment	Mechanical Variator
Surface Finish	Power Coated and also available in Color Coated
Threshing Drum Width	1275mm

Reel Type	Pick up
Height Adjustment	Hydraulic System
Air Cleaner	Dry Type
Min Cutting Height	60 mm
Working Width	4600 mm
Cutting Width	4300 mm
Operation	Manual

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
