

Product Name :
Snack Extruder Machines

Product Code :
EQMH-CHINA-MY3003002

Description :

Snack Extruder Machines

Technical Specification :

- Multi-Functional – Produces various shapes, textures, and flavors.
- High Output – Continuous operation for large-scale production.
- Precision Control – Adjustable temperature, pressure, and cutting speed.
- Hygienic Design – Food-grade stainless steel construction.
- Energy-Saving – Optimized for low power consumption.

Snack Extruder Machine – High-Efficiency Snack Production

The Snack Extruder Machine is a versatile and automated system designed to produce a wide range of expanded snacks, including puffs, curls, and pellets, from ingredients like corn, rice,

Twin screw food extruder Feature:

- Feeding system - Pre-mixes raw materials.
- Extrusion barrel - Cooks and shapes dough.
- Twin-screw mechanism - Ensures uniform texture.
- Die plate - Forms various snack shapes.
- Cutting unit - Precisely sizes products.
- Temperature control - Maintains optimal processing conditions.

Install Power	Real Power	Capacity
74KW	52KW	140-150kg/h

200KW	160KW	400-600kg/h
-------	-------	-------------

180KW

140KW

400-500kg/h
