

ELECTRIC POWER TOOLS

Electric Router

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3036001	Electric Power Tools	China, exported worldwide

Description

An electric router for woodworking, cutting grooves, rebates, edge profiles and joints with a shaped cutter spinning at high speed, used in joinery, furniture making and fit-out work.

The router is the most versatile tool in a joinery shop because the cutter determines what it does, so one machine with a set of cutters covers profiling, rebating, grooving, trimming and template work. Variable speed matters once you use larger cutters, which must be run slower. A plunge base widens the range of operations considerably over a fixed base. Contact EMC Machines Manufactures with your intended work and collet size requirement for a recommendation.

Technical specification

Variable speed control
Soft grip
Depth adjuster
Chuck Diameter: Ø12mm
No Load Speed: 16000-26000r/min
Rated Input Power: 1500w
