Description

Military shoes — service boots and shoes for armed forces, police and security personnel, covering combat boots, parade shoes and general duty footwear.

Footwear is where procurement economies hurt soonest, since a boot that fails or blisters takes a soldier off duty as effectively as anything else. Construction, sole attachment, ankle support and breathability for the climate it will be worn in are what separate a boot that lasts a deployment from one that does not. Terrain and climate should drive the specification: a desert boot and a cold-weather boot are not interchangeable. Contact EMC Machines Manufactures with your intended use, climate and size distribution for a quotation.
