

BALLISTIC OVERVEST

Front Opening Over Vests

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3045001	Ballistic Overvest	China, exported worldwide

Description

Front opening over vests — ballistic overvests that open at the front for rapid donning and removal, worn over a uniform or over existing body armour.

The front opening is the point of the design. A vest that goes on over the head takes time and both hands, which is the wrong arrangement for a rapid response role or for medical access to a casualty wearing it. Front closure solves both. Worn as an overvest it also allows protection to be added over normal uniform when a situation changes, rather than being worn all day. Supplied to a stated protection standard. Contact EMC Machines Manufactures with the standard required and your quantity.

Technical specification

Protection Areas: Front, Back & Sides
