

BOMB BLANKET

Ballistic and Blast Protection Blanket

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3046001	Bomb Blanket	China, exported worldwide

Description

A ballistic and blast protection blanket for covering a suspect device, a vehicle or an area to contain fragmentation and reduce blast effect, used by bomb disposal, police and security units.

A blast blanket does not remove a threat; it buys distance and reduces the fragmentation that causes most casualties in an explosion. That is a worthwhile role in a crowded or confined setting where a device cannot be moved or a cordon cannot be extended. Weight and the number of operators needed to deploy it are practical constraints worth checking against the way your teams work. Contact us with your deployment method and quantity requirement for a quotation.

Technical specification

The Bomb Blanket and Safety Circle is the most cost-effective and easy to use equipment currently available for containing fragments and shrapnel from explosive devices.

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
