

BOMB DETECTION EQUIPMENTS

Bomb Detection Instruments

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3047001	Bomb Detection Equipments	China, exported worldwide

Description

Bomb detection instruments for locating explosive devices and explosive residue, covering handheld detectors, trace detection equipment and search instruments used by military, police and security screening teams. Detection equipment is specified by what it actually detects and at what sensitivity, since a metal detector, an explosive trace detector and an X-ray screening system answer different questions and none of them substitutes for another. Operator training matters as much as the instrument, because false confidence in a device is more dangerous than not having one. We supply against a stated operational requirement. Contact EMC Machines Manufactures with the detection task, the environment and your quantity for a quotation.

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
