

GARAGE LIFTING EQUIPMENTS

Garage Hydraulic Motorcycle Lift

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3060001	Garage Lifting Equipments	China, exported worldwide

Description

A garage hydraulic motorcycle lift raising a motorcycle or scooter to working height on a hydraulic platform, so service and repair are done standing rather than on the floor.

A workshop doing volume two-wheeler work recovers the cost of a lift in time and in fewer injuries, since kneeling on concrete is slow and the machine is not secure. Platform size and capacity should be specified against the heaviest machine you handle, and the wheel clamp arrangement matters because a bike that shifts on the platform is the main hazard. Contact EMC Machines Manufactures with the machines you service and your capacity requirement for a recommendation.

Technical specification

600kg lifting capacity, 1000mm lifting height, 2200mm runway length.
With Pneumatic driven hydraulic pump, smooth running and user friendly.
Compact structure. Min. height is 110mm.

TECHNICAL DATA:

Standard platform size(LxW): 2200mmx700mm(86 5/8"x27 9/16")

Lifting Capacity: 600 Kg (1300 LBS)

Max. height lift: 1000 mm (39 3/8")

Min height: 110mm(4 5/16")

Pneumatic working pressure: 0.6-0.8Mpa
