

GARAGE BODY SHOP EQUIPMENTS

Dent Pullers

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3062001	Garage Body Shop Equipments	China, exported worldwide

Description

Dent pullers for automotive body repair, drawing dents out from the panel surface so the metal can be worked back to shape with minimal filler, covering slide hammer, stud welder and glue-pull types.

Which type suits you depends on whether the paint is being saved. Glue pulling works on the painted surface and is the method for paintless dent repair, where the panel is never refinished. Stud welding and slide hammers are faster and stronger on heavier damage but commit you to refinishing the panel. Many shops keep both. Contact EMC Machines Manufactures with your repair mix and we will advise on the right equipment.

Technical specification

Input Voltage	220V / 380V
Input Power	22kVA
Input Cureent	58A
Welding Thickness	0.8+1.2mm

Super Configuration:

Easy moving & operating esthetical design high power output functions such as vertical pulling , heating / contract sheet plate, spot weding, stud, platecutting, meson, flatten etc.

Achieve the best welding result by micro processor control, advanced digital control tec, and special personalize design due to choose the suitable welding strength.

Voltage monitor automatically.

Over heat protection.

Adopt curve silicon steel chip and relay.

Adopt precise time adjutment sysyem.

Various dismantling the vehicle, it is the most ideal and necessary equipment for auto maintenance.

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
