

TRAFFIC BARRIER

Temporary Expandable Plastic Traffic Barrier

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3063001	Traffic Barrier	China, exported worldwide

Description

A temporary expandable plastic traffic barrier that extends concertina-fashion to close a lane, a road or an area, and folds down compactly for transport and storage.

These are the right answer for a temporary closure where a concrete barrier would be absurd and cones are not enough, such as road works, event management, accident scenes and car park control. Being expandable, one unit covers a variable width, which is what makes them useful on a response vehicle. The plastic versions can be water-ballasted for stability, which is worth specifying for exposed or windy sites. Contact us with your required extended length and quantity for a quotation.

Technical specification

Foldable and expandable
