

**Product Name :**  
Puff Extruder Machine

**Product Code :**  
EQMH-CHINA-MY3003006

### **Description :**

Puff Extruder Machine

### **Technical Specification :**

Why Choose Our Puff Extruder Machine?

High Efficiency – Fast production with minimal waste.

Versatile – Works with multiple ingredients and recipes.

Easy to Operate – User-friendly automation.

Key Components of a Puff Extruder Machine?

Feeding System

Hopper: Stores raw materials (corn, rice, wheat, etc.) before processing.

Screw Feeder: Precisely controls the flow of ingredients into the extrusion barrel.

Extrusion Barrel & Screw

Single-Screw or Twin-Screw Design: Determines texture and expansion level.

Heating/Cooling Zones: Regulates temperature for optimal puffing.

Die & Cutting Unit

Interchangeable Dies: Creates different shapes (balls, rings, stars).

Rotary Cutter: Ensures uniform snack size.

Expansion Chamber

Controls puffing effect for light, crispy textures.

Control Panel (PLC/HMI)

Automates temperature, speed, and pressure adjustments.

Install Power	Real Power	Capacity
70KW	50KW	120-150KG/H
110kw	80KW	220-250KG/H
180kw	140KW	350-500KG/H
