

**FIRE DETECTION SYSTEM**

# Fire Detection System

| PRODUCT CODE         | CATEGORY              | ORIGIN                    |
|----------------------|-----------------------|---------------------------|
| EQMH-CHINA-MY3067001 | Fire Detection System | China, exported worldwide |

## Description

A fire detection system comprising detectors, call points, sounders and a control panel, monitoring a building for signs of fire and raising an alarm, with options for addressable identification of each device.

Detector selection is the part that determines whether a system works in practice or gets switched off because of false alarms. Smoke detectors are the usual choice but are wrong in a kitchen, a dusty store or a vehicle bay, where heat detectors are appropriate. Matching detector type to each area is the design work. Contact EMC Machines Manufactures with your building layout and the use of each area and we will specify the system.

### Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
