

FIRE BLANKET

Relief Low Thermal Blankets

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3069001	Fire Blanket	China, exported worldwide

Description

Relief low thermal blankets for emergency and humanitarian distribution, providing basic insulation to people displaced by disaster, conflict or exposure.

Relief blankets are procured in bulk against a specification of weight, size and thermal performance, because an agency needs to know what it is distributing and to repeat the order consistently. The practical considerations are packed volume, since transport and warehousing cost more than the blankets in many operations, and durability, since a blanket that lasts one season is a recurring cost. Supplied compressed and baled for shipment. Contact us with your size, weight and packing requirement and the quantity for a quotation.

Technical specification

- ICRC/IFRC Standard
- Resistant to fire, thermal & air flow
- Minimum 1.5 TOG for indoor use, on a bed, in a house with heating facilities
- 1.5m x 2m low synthetic blankets made of virgin fibres from polyester, knitted and dry raised both sides, ISO 1833 on dry weight, 100% virgin polyester
- Recommended for indoor use, on a bed, in a house with heating facilities.
