

COLD FRIDGE AND FREEZER COMBINE

Combined Upright Refrigerator Freezer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3080001	Cold Fridge and Freezer Combine	China, exported worldwide

Description

A combined upright refrigerator freezer with separate chilled and frozen compartments in one upright cabinet, each with its own temperature control, for kitchens where both are needed and floor space is limited. The combined cabinet is a floor space decision rather than a performance one. Two separate units give more capacity and independent reliability, so a failure takes out only half your storage, while one combined cabinet occupies a single footprint and costs less. In a small commercial kitchen that trade usually favours the combination. Check that each compartment has its own evaporator rather than sharing one. Contact us with your chilled and frozen volume requirements for a recommendation.

Technical specification

The island freezer with cooler cases is industry leaders in energy efficiency, while providing stable temperatures and a maintenance friendly design.
Two design: Top chiller, bottom freezer.
Top and bottom freezer bottom island design with upside cooler conserves energy
