

COLD WINE COOLER

Compressor Wine Cooler Wine Cellar

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3083001	Cold Wine Cooler	China, exported worldwide

Description

A compressor wine cooler and wine cellar cabinet holding wine at serving or storage temperature, with compressor cooling rather than thermoelectric, for restaurants, bars, hotels and retail.

Compressor cooling is the choice where the cabinet has to hold temperature in a warm room, because thermoelectric units can only pull a limited difference below ambient and lose control in a hot bar. For storage rather than service, humidity matters too, since air that is too dry will dry out corks over time. Dual zone cabinets hold red and white at different temperatures. Contact us with your bottle capacity and whether single or dual zone.

Technical specification

Imported famous compressor ,Accurate refrigeration.

Stable Control system for wine storage

Digital temperature controller ensure better temperature control and saving energy

Fully spread air flow,Better refrigeration effect no pollution

Luxury Design anti-noise features

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
