

Product Name :
Snacks Food Making Machines Production Plant

Product Code :
EQMH-CHINA-MY3003008

Description :

Snacks Food Making Machines Production Plant

Technical Specification :

Modern snack food making machines feature high automation, ensuring efficient large-scale production with minimal manual intervention.

They offer versatility to produce various snacks—extruded, baked, or fried—using customizable recipes.

Advanced temperature and moisture control guarantee consistent quality, while food-grade materials meet hygiene standards.

Energy-efficient designs reduce operational costs, and modular setups allow easy upgrades.

Smart sensors enable real-time monitoring for optimal performance, making them ideal for both startups and established manufacturers seeking scalable, reliable snack production solutions.

Snack Food Production Line: Composition & Applications

A complete snack food production line typically includes:

Pre-processing – Mixers, blenders for raw material preparation

Forming – Extruders, molding machines for shaping snacks

Cooking – Multi-zone ovens, fryers or air dryers

Flavoring – Seasoning drums, spray coaters

Packaging – Automated weighing, filling and sealing machines.

Key Applications:

Extruded snacks (cheese balls, puffs) – Twin-screw extrusion systems

Baked chips/crisps – Conveyorized baking tunnels

Fried snacks – Continuous fryers with oil filtration

Protein/nutritional bars – Cooling tunnels and cutting systems
Ready-to-eat popcorn – Automated seasoning and packaging lines

Installed Power	74kw	105kw	205kw
Power Consumption	55kw	75kw	150kw
Production Capacity	100-150kg/h	100-150kg/h	400-500kg/h
