

CONCRETE PUMP TRUCK

55m Concrete Pump Trucks

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3094001	Concrete Pump Truck	China, exported worldwide

Description

55m concrete pump trucks — a truck-mounted concrete boom pump with a 55 metre vertical reach, placing concrete at height and over obstructions from a position on the road.

Boom reach is the specification that decides which jobs the machine can take, and 55 metres puts it in the range used for medium to high-rise construction. The reach figure is vertical; horizontal reach is considerably less, and it is the horizontal figure that usually governs on a constrained site, so both should be checked against your typical job. Set-up area and outrigger footprint matter equally. Contact EMC Machines Manufactures with your typical building height and site access for advice.

Technical specification

Max. Placing height: 55.6m
Max. Placing depth: 42.8m
Max. Placing radius: 51.1m
Hopper capacity: 550L
