

FIRE FIGHTING TRUCK

8 Ton Firefighting Trucks

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3096001	Fire Fighting Truck	China, exported worldwide

Description

8 ton firefighting trucks — a fire appliance on an 8 tonne chassis carrying water, a pump, hose and equipment, sized for municipal, industrial site and airport standby duty.

Water capacity is the figure that governs how a first-attack appliance performs, since once the tank is empty the crew depends on a hydrant or a relay, and on an industrial site or a rural road there may not be one. Pump output and foam capability should be matched to the risk being protected, as an industrial chemical risk needs foam the way a domestic risk does not. Contact EMC Machines Manufactures with the risk you are protecting for a specification.

Technical specification

Rated Weight: 7700kgs

Tank Capacity: 8M3

Engine Power: 206 kw

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
