

Product Name :
Snack Food Processing Machinery

Product Code :
EQMH-CHINA-MY3003009

Description :

Snack Food Processing Machinery

Technical Specification :

14 years of food production line manufacturing and export experience.
Provide different product formulations.
One-year warranty, long-term supply of spare parts at discounted prices
Engineers on-site installation and commissioning, training technicians.
Provide professional equipment selection, process flow, plant design advice.

Non-Fried Snack Food Processing Machinery

Non-fried snack processing machinery produces healthy snacks using baking, extrusion, or hot-air drying instead of frying.

These machines ensure low-oil, nutritious snacks like baked chips, puffed cereals, and protein bars.

Advanced technology maintains flavor and crispiness while reducing fat content.

Ideal for health-conscious consumers, the equipment is energy-efficient and meets food safety standards.

Suitable for small and large-scale production, it supports the growing demand for better-for-you snack options.

Snack Food Processing Machinery:

Snack food processing machinery consists of several key components, including mixers, extruders, ovens, fryers (or non-fry dryers), flavor coaters, and packaging systems. These machines handle ingredient preparation, shaping, cooking, seasoning, and packaging in automated production lines.

Installed Power	74kw	105kw	205kw
Power Consumption	55kw	75kw	150kw

Production Capacity	100-150kg/h	100-150kg/h	400-500kg/h
