

ROAD MILLING MACHINE

Crawler Cold Planers

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3099001	Road Milling Machine	China, exported worldwide

Description

Crawler cold planers — a tracked road milling machine that removes asphalt and concrete to a controlled depth, producing millings for recycling and a profiled surface ready for resurfacing.

Cold planing is how a road is resurfaced without raising its level, which matters wherever kerbs, drainage and building thresholds set the finished height. Drum width and milling depth are the specification: a small machine suits patching and utility trenches, while a full-lane machine is needed for highway resurfacing at any useful rate. Picks are the main consumable. Contact EMC Machines Manufactures with your typical milling width and depth for a recommendation.

Technical specification

Max. Milling Width: 1200-2000 mm

Max. Milling Depth: 300-320 mm

Driving type: crawler type
