

DRILLING RIG EQUIPMENTS

160, 200, 220, 260 Rotary Drilling Excavators

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3100001	Drilling Rig Equipments	China, exported worldwide

Description

Rotary drilling excavators in 160, 200, 220 and 260 class sizes — rotary drilling rigs for bored pile foundations, drilling and casing shafts for cast-in-place concrete piles.

Rig selection follows from the pile schedule rather than from the machine. Required pile diameter and depth, together with the ground conditions, determine the torque and crowd force needed, and a rig chosen a class too small simply will not reach the depth in hard ground. The four classes here cover the common range of building and bridge foundation work. Contact us with your pile diameter, depth and a soil report and we will advise on the class required.

Technical specification

Max. Output Torque: 160-260 kN.m

Max. Drilling Diameter: 1300-2000 mm

Max. Drilling Depth: 56-72 m
