

DRILLING AND BORE WELL EQUIPMENTS

Automatic Water Bore Well Drilling Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3105001	Drilling and Bore Well Equipments	China, exported worldwide

Description

An automatic water bore well drilling machine for drilling water boreholes, in a truck-mounted or trailer configuration with the rotary or DTH hammer drilling system suited to the ground.

Drilling method is decided by the formation. Rotary mud drilling suits soft and unconsolidated ground, while down-the-hole hammer drilling is what you need in hard rock, and a rig specified for the wrong one will not reach depth. Compressor capacity is the governing figure for hammer drilling. Casing handling and required depth also shape the rig. Contact us with your typical formation, target depth and borehole diameter and we will advise on the rig configuration.

Technical specification

We are the leading entity in the industry, highly engaged in offering the best quality range of Tractor Mounted Core Drilling Rig.

Product Type : Bore Well Drilling Machine

Operation : Semi-Automatic

Hole Diameter : 200-250 mm

Work Pressure : 1-2 Pa

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
