

COMPUTER IT AND ICT EQUIPMENT

Network Backup Solutions NAS

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3107001	Computer IT and ICT Equipment	China, exported worldwide

Description

Network backup solutions NAS — network attached storage providing shared, backed-up file storage on a local network, for offices, institutions and sites that need their data held and recoverable on their own premises. The point of a NAS is that backup becomes automatic rather than something somebody remembers to do. The configuration decision is the RAID level, which trades usable capacity against how many disks can fail without losing data, and the thing most buyers get wrong is treating RAID as a backup: it protects against a disk failing, not against fire, theft or deletion, so an off-site copy is still needed. Contact us with your capacity and user count for a specification.

Technical specification

ICT Equipment and a host of other products and related peripherals, we provide them as a means to solve our customer's business problem in the most suitable and cost-effective manne

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
