

CYBER SECURITY EQUIPMENTS

High Power Cellphone Jammer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3108001	Cyber Security Equipments	China, exported worldwide

Description

A high power cellphone jammer blocking mobile signal within an area, used in prisons, examination halls, secure facilities and government installations where mobile communication must be prevented.

Jammers are restricted or prohibited equipment in most countries, and operating one without authorisation is an offence in nearly all of them, so the first requirement is the legal authority to use it rather than any technical specification. Where use is authorised, the specification concerns the frequency bands covered and the effective radius, which must be contained within your own premises. Contact EMC Machines Manufactures with your authorisation, the area to be covered and the bands required.

Technical specification

This device is a high power cellphone jammer dedicated to the field of open air environment or a large area of the signal shielding, such as prisons, schools, military, large factories and mines enterprises.

Maximum Shielding range: a radius of 2 to 10 meters (-85dBm?depending on the surrounding base station)

Transmission power: each channel 10 ~ 15W

Shielding frequency:2G,3G,4G,5G

Output channel: Number of channels and appearance subject to actual delivery

The frequency band of shielding can be customized

Each channel can work and be switched independently

The output power of each channel can be smoothly adjusted

Main set dimension: 415*175*75
Power supply dimension: 225*114*50
Package dimension: 580*340*325
Temperature: -20?55?
Humidity: 35?85%
Power consumption: 250W
Power input: AC 160V?240V
Power output: DC 27V/14.6A

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
