

RELIEF BLANKETS

Fleece Thermal Blanket

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3109001	Relief Blankets	China, exported worldwide

Description

A fleece thermal blanket for relief distribution, institutional supply and cold-weather issue, in synthetic fleece which is light, warm for its weight and quick to dry.

Fleece is often preferred over wool in relief work for practical reasons: it is lighter to ship, it does not absorb much water, it dries quickly after wetting, and it costs less per unit at scale. Wool holds an advantage in extreme cold and in fire resistance, which matters where open heating is used. Supplied in standard relief sizes, compressed and baled. Contact EMC Machines Manufactures with your size, weight specification and quantity for a quotation.
