

RELIEF BUCKETS

Regular Plastic Buckets

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3111001	Relief Buckets	China, exported worldwide

Description

Regular plastic buckets for relief distribution and general use, supplied with handles and lids for water collection, storage and household use in camps and affected communities.

Buckets are one of the most used items in a relief distribution, and the specification points that matter are the handle attachment, which is where a cheap bucket fails first when carried full, the lid fit, which decides whether stored water stays clean, and whether the plastic is food grade. Nesting shape is worth checking too, since it determines shipping volume. Contact us with your capacity requirement, lid specification and quantity for a quotation.

Technical specification
