

WATER IRRIGATION EQUIPMENTS

Water Irrigation 4 Stroke Water Pump 3 Inch

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3140001	Water Irrigation Equipments	China, exported worldwide

Description

A water irrigation 4-stroke water pump with a 3 inch outlet, engine driven for field irrigation, drainage and water transfer where there is no mains electricity.

The 3 inch size is the common irrigation pump for smallholdings and medium plots, moving useful volume at the modest head that surface irrigation needs. A four-stroke engine runs on straight petrol without mixing oil, is quieter and uses less fuel than a two-stroke, and lasts longer under the long running hours irrigation involves. Suction lift and total head decide whether this size suits your situation. Contact us with your water source depth and the area to be irrigated.

Technical specification

Suction: 8 m
Type of Product: Water Pump
Lift: 28 m
Idle speed: 3000 r/min
Engine Power: 3 Kw
Inner Diameter: 80 mm
Flow Capacity: 1000 l/min
Displacement: 206 CC
Max. Engine Speed: 4000 r/min
