

FRUIT PULP PROCESSING PLANT

Guava Fruit Processing Plant

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3143001	Fruit Pulp Processing Plant	China, exported worldwide

Description

A guava fruit processing plant producing guava pulp and puree, covering washing, sorting, destoning, pulping, refining, thermal treatment and aseptic or hot filling.

Guava carries hard seeds and a gritty cell structure, which makes pulping and refining the stages that decide product quality: too coarse and the pulp is gritty, too aggressive and the seeds break and release off-flavour. Aseptic packing in bags or drums is normal for pulp, since it ships at ambient and feeds beverage and dairy manufacturers. Contact EMC Machines Manufactures with your daily fruit intake and pack format for a plant layout.
