

DAIRY PROCESSING PLANT

Dairy Processing Plant and Machinery

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3144001	Dairy Processing Plant	China, exported worldwide

Description

A dairy processing plant and machinery package covering milk reception, chilling, pasteurisation, separation, standardisation, packing and the cleaning systems around them.

Dairy is a plant rather than a machine purchase because the product is perishable from the moment it arrives and every stage has to be sized against the reception rate. The decisions that shape the plant are the product mix and the shelf life you intend to claim, as pasteurised fresh milk, extended shelf life milk and UHT need different thermal processing and different packaging. Contact EMC Machines Manufactures with your daily intake and product range and we will lay out the plant.

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
