

STAINLESS STEEL TANKS

Food Milk Receiving Tank

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3154001	Stainless Steel Tanks	China, exported worldwide

Description

A food milk receiving tank holding incoming milk at reception, buffering delivery against the processing rate so the plant runs steadily rather than in step with the tankers.

A reception tank has two jobs beyond holding volume: it keeps the milk cold from the moment it arrives, since bacterial counts rise quickly otherwise, and it gives the plant a measured, agitated volume to draw from. Insulation, agitation and CIP cleanability are therefore the specification, along with level measurement for reception accounting. Contact EMC Machines Manufactures with your daily intake and delivery pattern and we will size the tank.

Technical specification

Milk receiving tank is also of fine looking, simple construction and ea-siness to clean. It is grouped with series milk tank, and its material outlet can changed according to your equipment layout to fit the over all layout.

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
