

CARBONATED BEVERAGE EQUIPMENT

Carbonated Drinks Mixer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3158001	Carbonated Beverage Equipment	China, exported worldwide

Description

A carbonated drinks mixer — a carbonation and blending unit combining treated water, syrup and carbon dioxide in controlled proportion before the filler, for soft drinks and carbonated beverage production. Carbonation level is a product specification that customers notice immediately, and holding it depends on water temperature and dissolved oxygen as much as on CO2 pressure, since cold deaerated water takes and holds gas far better. The mixer therefore usually includes chilling and deaeration. Syrup ratio accuracy decides the flavour and the sugar cost. Contact EMC Machines Manufactures with your product, carbonation level and filler capacity for a specification.

Technical specification

The machine is suitable for carbonated drinks and other gas beverage production, this machine and liquid mixture of parts contacted with low carbon high quality stainless steel to make, can meet different international food hygiene requirements. The PLC technology control pressure tank and liquid surface height, meet the abnormal situation immediately report to the police, while automatically end orders, whole structure compact equipment operation, stable and efficient, easy to operate, safe, is a drink production safety essential equipment

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
