

STRAPPING SEALING MACHINE

Vertical Foot Operated Pouch Sealer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3164001	Strapping Sealing Machine	China, exported worldwide

Description

A vertical foot operated pouch sealer sealing filled pouches and bags by heat, operated by a foot pedal so both hands stay free to position the pouch.

This is the right machine for small-batch and manual packing operations, where an automatic bagger cannot be justified and a hand-held sealer is too slow and inconsistent. The foot pedal and vertical format are what make it quick in practice, as the operator simply presents the pouch and steps. Seal time and temperature are set to the film, and a seal that looks fine on the wrong setting will open in transit. Contact EMC Machines Manufactures with your film type and pouch size.

Technical specification

Foot sealer sealing machine suitable for 1/2kg to 25 kg.pouch high Quality of Sealing.Accurate sealing of pouch packing machine like tea,confectionery,wafers,snacks,powder. Very fast production and low maintenance.LD, PP, BOPP all the pouch you can seal it.
