

**Product Name :**  
Macaroni Food Making Machine

**Product Code :**  
EQMH-CHINA-MY3004008

**Description :**

Macaroni Food Making Machine

**Technical Specification :**

Compact structure novel design and stable performance, developed on the base of like produces and requirements in the world market.

It realizes high automation, convenient operation, low energy and small floor space, that assures all working procedures from feeding flour to finished once.

This is Full automatic pasta production line.

It is suitable for small and medium factories.

Some factories don't have enough space and they want to spend small money to start the pasta business then this line is the best option.

This pasta production line needs small workshop space, low electricity consumption. Although it is a Semi-automatic machine it doesn't need too many workers, Three workers are enough.

| Install Power | Real Power | Capacity    |
|---------------|------------|-------------|
| 105KW         | 73KW       | 120-150kg/h |
| 190KW         | 135KW      | 250-300kg/h |
| 250KW         | 175KW      | 350-400kg/h |
