

BOTTLE FILLING BATCH CODING MACHINERY

Character Ink Jet Printer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3165001	Bottle Filling Batch Coding Machinery	China, exported worldwide

Description

A character ink jet printer marking batch codes, dates, lot numbers and simple text onto bottles, cartons, pouches and cases as they pass on the line, without contacting the product.

Date and batch coding is a legal requirement in most markets, so the practical questions are whether the code stays legible on your packaging material and whether it survives the handling and condensation it will meet. Ink choice is matched to the substrate, and a code that wipes off a wet bottle is a failed inspection. Print height and line speed set the model. Contact us with your packaging material and line speed for a recommendation.

Technical specification

Model Type: Hand Held Inkjet Printer
 Print Method: HP Cartridge
 Capacity: 500 pieces per minute
 Automation Grade: Manual
 USB Available: Yes
 Type: Ink Jet
 Uses: Ink
