

GARAGE GENERAL SERVICE EQUIPMENTS

Garage Injector Cleaner

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3169001	Garage General Service Equipments	China, exported worldwide

Description

A garage injector cleaner for cleaning petrol and diesel fuel injectors, using ultrasonic cleaning, solvent flow or on-vehicle induction to clear deposits and restore spray pattern.

Cleaning an injector is only worthwhile if you can see the result, which is why a bench unit with flow and spray pattern testing is more useful than a cleaning tank alone: it tells you whether the injector is now within specification or needs replacing. On-vehicle cleaning is quicker and suits routine service work but gives no measurement. Contact us with whether you need bench testing capability and the injector types you handle.

Technical specification

We manufacture the Garage Injector Cleaner as part of our Garage Workshop Equipments range, for single-unit and bulk supply.

Built to a fixed technical specification, set out in full below, and quoted against the quantity and destination you need.
