

Product Name :
Textured Vegetable Protein Machine

Product Code :
EQMH-CHINA-MY3005007

Description :

Textured Vegetable Protein Machine

Technical Specification :

This processing line uses soybean powder and peanut powder to break spherical protein molecule to Form chain protein molecule thus creating slice-like fiber structure, by powder-grinding, stirring, high-temperature, high-pressure and high-cutting.

Tissue protein food processing line The product is nutritious without Cholesterol or animal fat, but it looks like and tastes like meat with the quality of absorbing soil, water, and flavor.

Tissue protein food processing line Meat analog making machine, vegetarianmeat chunks machine

Tissue protein processing line uses the newest production equipment which is researched and developed according to the market demand and country's basic condition and basing on the advanced equipments.

Tissue protein food processing line Meat analog making machine,vegetarian meat chunks machine

This Textured vegetable protein machine uses the soybean and the peanut as the raw material and makes the round protein moisture become the chain shape and reorganization then form the sheet fibre structure by grinding ,mixing, conditioning, high temperature, high pressure and high cutting.

Tissue protein food Meat analog making machine,vegetarian meat chunks machine This product has the high nutrition ,the meaty state and taste.

Meanwhile it does not include the cholesterol and the animal tallow.

Tissue protein food processing line Meat analog making machine,vegetarian meat chunks machine

It has the following features such as oil-absorbing, water-absorbing, ador-absorbing and can be used in all kinds

of professions .

The peanut and the tissue protein are a creation both here and abroad which have the following features: fine tissue, clear fiber, without the raw soybean taste. It is similar to the animal muscle state.

Tissue protein food processing line Meat analog making machine, vegetarian meat chunks machine

The Textured vegetable protein machine has become the seriation and many kinds of collocations which can meet the different customers needs .

The processing line Tissue protein food processing line Meat analog making machine, vegetarian meat chunks machine.
