

**Product Name :**  
Double Screw Food Extruder

**Product Code :**  
EQMH-CHINA-MY3006001

**Description :**

Double Screw Food Extruder

**Technical Specification :**

**Key Features:**

- High Efficiency – Continuous operation with uniform output
- Flexible Production – Adjustable screws and dies for diverse products
- Nutrient Retention – Controlled extrusion preserves nutritional value
- Hygienic Design – Food-grade stainless steel construction
- Automated Control – PLC system for consistent quality

**Double Screw Food Extruder – Versatile Food Processing Solution:**

The Double Screw Food Extruder is a high-performance machine designed for producing a wide range of extruded food products, including snacks, cereals, pet food, and textured vegetable protein (TVP). Its twin-screw technology ensures efficient mixing, cooking, and shaping of raw materials under precise temperature and pressure control.

- Twin-screw assembly (intermeshing/conical screws)
- Modular barrel sections with heating/cooling zones
- Variable die head for product shaping
- Precision cutter with speed control
- Pre-conditioning feeder system
- PLC with HMI touchscreen
